

## **Versatile Tactical Pen – Great for Emergencies and Self-Defense!**

### **Product Description**

Be safe in even the most dangerous situations!

This easy to use, low-profile tactical pen, is a must have for running, jogging and even biking at night. Ensures that you always have a first-line of defense in hostage, desperate or dangerous situations.

Best of all, it works perfectly as a real, professional ball-point pen, using standard ball-point refills (see details below).

This state-of-the-art Tactical Pen is ruggedly constructed of heavy duty lightweight aviation – aerospace grade aluminum. It also features an ultra-durable glassbreaker, that can also be used as a DNA collector for criminal investigation evidence.

Fully tested and proven in various field situations and conditions.

Designed and developed to the specifications and requirements of spy agencies, security forces and military agents worldwide.
